## PROFESSIONAL SUMMARY

Experienced Full Stack Developer with over three years of expertise in developing and deploying robust web applications. Specializes in utilizing technologies such as React and Node.js and implementing cloud-based solutions using Azure PowerShell. Proficient in optimizing development processes through Azure DevOps and CI/CD pipelines to ensure the continuous delivery of high-quality software solutions. Collaborative team player dedicated to staying updated with industry trends to enhance development practices.

## SKILLS

- **Languages:** Java, Python, JavaScript, HTML5, CSS3
- **Frameworks/Libraries:** React.js, Angular, Node.js, Bootstrap
- **Tools:** Azure PowerShell, Azure DevOps, npm, Visual Studio Code
- **Databases:** PostgreSQL
- **Version Control:** Git, GitHub
- **Office Tools:** Microsoft Word, Microsoft Excel, Microsoft PowerPoint

## PROFESSIONAL EXPERIENCE

### Software Engineer

Value Momentum, Hyderabad

#### Project Name: Admin Panel

**Tech Stack:** React, Node.js, Azure PowerShell, Azure DevOps

**Duration:** 07/2021 – Present

**Role:** Full Stack Developer

#### Description:

This project focuses on an interactive dashboard designed for users to effortlessly oversee and manage users, roles, teams, and applications. Core responsibilities involve the creation of new users and teams, the inclusion of users in teams, the assignment of roles to users, the registration of applications, and the allocation of applications to teams, streamlining the entire user and application management process.

#### Roles and Responsibilities:

- Developed highly responsive web applications using React.js, enhancing user engagement.
- Collaborated with back-end developers to integrate RESTful APIs, resulting in a seamless data flow between the client and server.
- Optimized web application through code splitting and lazy loading techniques.
- Utilized Git for version control, ensuring consistent and reliable code management across multiple projects.

## **Junior Software Engineer**

ICT Health, Bengaluru

**Project Name:** Sehaki

**Tech Stack:** Angular

**Duration:** 02/2021 – 07/2021

**Role:** Front End Developer

### **Description:**

This portal serves as a platform to establish a connection between healthcare providers and patients. Within the portal, patients can submit appointment requests and provide details about their medical concerns. This portal incorporates a system where, depending on the doctor's schedule, we actively send appointment details to both the doctor and the patient. Additionally, we include an online meeting link for virtual consultations if the patient is unable to visit the hospital in person. The portal features a versatile search functionality with both text and voice inputs, allowing users to search for doctors and access information about prescribed medicines.

### **Roles and Responsibilities:**

- Implemented the Annyang module within Angular to facilitate seamless speech-to-text conversion across all input fields on every page of the Sehaki project. This integration significantly enhanced accessibility, contributing to an improved overall user experience throughout the project.
- Created reusable and maintainable components to streamline development and improve code quality.
- Worked closely with UX/UI designers to translate designs into high-quality code.
- Provided technical support and troubleshooting for production and development environments.

## **CERTIFICATIONS**

- [Frontend Developer \(React\) Certificate, Hacker Rank](#)
- [React Basic Skill Assessment Certificate, Hacker Rank](#)
- [Angular Basic Skill Assessment Certificate, Hacker Rank](#)
- [JavaScript Basic Skill Assessment Certificate, Hacker Rank](#)

## **EDUCATION**

### **Master of Science in Information Technology**

International Institute of Information Technology (IIIT-H), Hyderabad

2019 – 2021

GPA: 7.93/10

### **Bachelor of Technology in Computer Science Engineering**

Vikas College of Engineering and Technology, Vijayawada

2014 – 2018

Percentage: 70%
